

Audit Management — Feature Specs

What each screen does and the key rules that govern behavior. Medium detail — enough for a PO to write stories and an engineer to build, without prescribing implementation.

1 · Dashboard

The landing screen for the quality team. A configurable grid of cards giving program-level visibility.

- **KPI tiles** — audits in progress, open findings, overdue actions, on-time action closure, audits completed YTD.
- **Active & Upcoming Audits** — a shortlist with supplier, lead, dates, status and progress; links into each audit.
- **Open Findings by Severity** — donut breakdown (Major Non-Conformity / Minor Non-Conformity / Observation).
- **Audit Calendar** — month view of scheduled audits.
- **Audit History by Supplier** — completed audits with result; configurable columns.

Dashboard — KPI tiles, active audits, findings by severity, calendar and supplier history.

2 · Audits (Overview)

The master list of all audits, with list and calendar views.

- **Data grid** — audit ID, supplier/site, lead & team, window, status, findings, progress. Every column is **sortable** (click to sort, again to reverse, third click clears).
- **Quick Filter** — a side panel (opened from the filter icon) to filter by Status, Supplier and Timeline, with live counts, an active-filter summary and removable chips.
- **Status Key** — an info popover explaining the lifecycle order and each status.
- **Calendar view** and **Plan Audit** entry point.

Audit ID	Supplier / Site	Lead & Team	Window	Status	Findings	Progress
AUD-2026-014	Bayreuth Polymer Systems GmbH Bayreuth, DE	JD RK KR	06/15/2026 → 06/19/2026	In Progress	5	62%
AUD-2026-013	Apex Fastener Group Cleveland, OH	AT SM	06/08/2026 → 06/12/2026	Overdue	8	80%
AUD-2026-012	Tianjin Circuit Works Ltd. Tianjin, CN	AT RK	06/03/2026 → 06/06/2026	Reporting	6	100%
AUD-2026-015	Veritas Surface Treatments Sheffield, UK	JD SM	06/22/2026 → 06/25/2026	Scheduled	—	0%
AUD-2026-016	Veritas Surface Treatments Sheffield, UK	AT RK	06/29/2026 → 06/30/2026	Scheduled	—	0%
AUD-2026-011	Nordic Precision Components AB Göteborg, SE	JD RK	05/19/2026 → 05/22/2026	Completed	2	100%
AUD-2026-010	Rheinmetall Tooling GmbH Düsseldorf, DE	AT SM	06/01/2026 → 06/04/2026	Sent to Supplier	4	100%
AUD-2026-009	Lombardi Castings S.r.l. Brescia, IT	JD SM	05/06/2026 → 05/08/2026	Completed	1	100%
AUD-2026-017	Kawasaki Seal & Gasket Co. Osaka, JP	JD	07/13/2026 → 07/15/2026	Draft	—	0%

Audits — the sortable list view with status tags and team avatars.

3 · Audit Detail

Where an audit is carried out. Organized into tabs: **Checklist**, **Findings**, **Report**, **Actions**, **Communication**, **Team & Documents**, **Log**. A right-hand summary shows assessment counts, supplier info and the conformance score.

- **Checklist** — sections of questions, each answered Conforming / Non-Conforming / Observation / N/A, with auditor notes and required markers. Sectioned, single-flow and split layouts are available.
- **Findings** — issues recorded from the checklist, filterable by severity.
- **Report** — generate and view the audit report inline.

- **Actions** — corrective actions linked to this audit.
- **Communication / Team & Documents / Log** — supporting context and history.

The **primary action button** changes with the lifecycle: *Generate Report* → *Send Audit to Supplier* → *Mark Audit Complete*.

3.1 · Status-driven behavior rules

The audit's status determines what the user can do on the Audit Detail screen. This matrix is the single most important behavioral spec — build against it directly.

Status	Answers	Notes	Findings / Actions	Communication	Primary button
Draft	Disabled, no defaults	Disabled	Tabs disabled (0)	Disabled (0)	Generate Report
Scheduled	Disabled	Disabled	Tabs disabled	Disabled (0)	Generate Report
In Progress	Editable	Add / Edit	Enabled	Enabled	Generate Report
Reporting	Editable	Add / Edit	Enabled	Enabled	Generate → Send to Supplier
Sent to Supplier	Locked (read-only)	Read-only	Enabled	Enabled	Mark Audit Complete
Completed	Locked (read-only)	Read-only	Enabled	Enabled	(none)

Notes: "Required" markers indicate mandatory questions but do not block report generation. Locked answers show the chosen response in a muted style so the record is clearly read-only.

4 · Reports

A workspace listing every audit report with its supplier, conformance score and status. Report status has two values — **Not Sent to Supplier** and **Sent to Supplier**. Selecting a report opens that audit's Report tab.

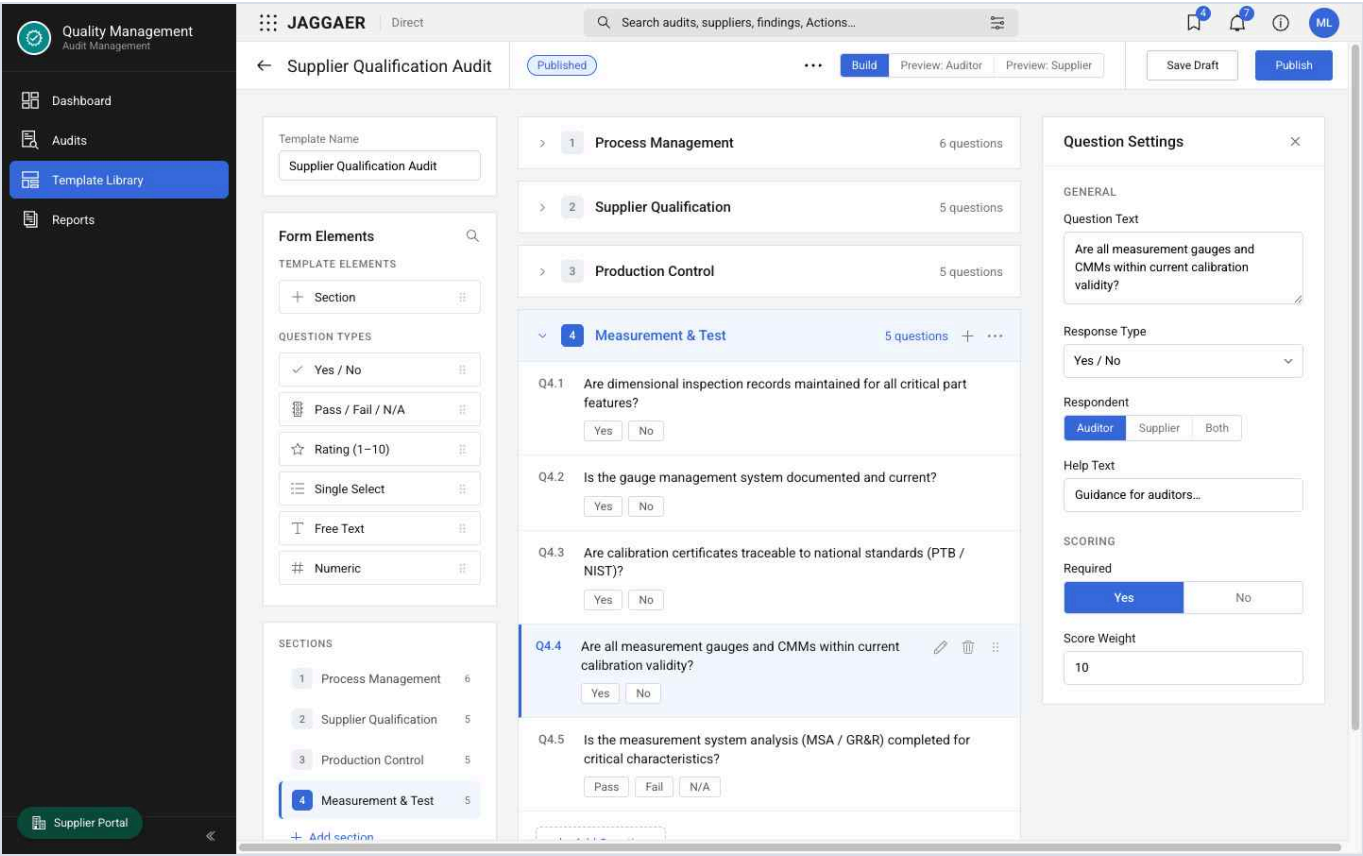

Report	Supplier	Lead Auditor	Conformance	Findings	Result	Issued	Status
RPT-2026-012 AUD-2026-012	Tianjin Circuit Works Ltd.	AT Aiko	82%	6	Conditional Pass	—	Not Sent to Supplier
RPT-2026-010 AUD-2026-010	Rheinmetall Tooling GmbH	AT Aiko	82%	4	Pass	06/04/2026	Sent to Supplier
RPT-2026-011 AUD-2026-011	Nordic Precision Components AB	JO Jonas	90%	2	Pass	05/22/2026	Sent to Supplier
RPT-2026-009 AUD-2026-009	Lombardi Castings S.r.l.	JO Jonas	96%	1	Pass	05/08/2026	Sent to Supplier

Reports — every audit report with score and send status.

5 · Template Library & Builder

Manage the reusable checklist templates that audits are run against.

- **Library** — all templates with structure (sections · questions), usage, last-updated and status (Published / Draft / Deactivated).
- **Builder** — three areas: **Template Name**, a **Form Elements** palette (add sections and question types), and a **Sections** navigator. The center canvas holds the sections and questions; a right panel edits the selected question's response type, respondent, required flag, help text and score weight.
- Sections are sequentially numbered; questions read Q1.1, Q1.2, and so on.

Template Builder — Template Name, Form Elements palette, Sections navigator, and the per-question settings panel.

6 · Supplier Portal

An alternate shell representing the supplier's own view — the audits that involve them and the tasks (corrective actions) assigned to them.

Part of a three-document set: (1) Product Overview · (2) User Journeys · (3) Feature Specs.
