EXECUTIVE PROFILE

Lead Enterprise Product Designer & AI Design Engineer with 15+ years of experience bridging product strategy, human-centered design (HCD), front-end architecture, and generative AI mechanics. Proven track record partnering with Product and Engineering leaders in complex SaaS environments to translate dense business logic into production-ready UI frameworks, stateful component schemas, and accessible human-in-the-loop (HITL) workflows.

Leverages rapid code-based sandboxing (Claude Design, Cursor), high-fidelity Figma prototyping, and W3C design token systems to de-risk complex interface logic, eliminate technical debt, and prevent engineering rework prior to sprint build.

TECHNICAL & DESIGN EXPERTISE

- **Prototyping & Execution Tooling**
Advanced Figma (Design Systems, High-Fi Prototyping), Rapid Low-Code/No-Code Sandboxing (Claude Design, Cursor, n8n), Front-End State Modeling, System Prompting & Schemas, HTML5/CSS3.
- **Product Discovery & UX Strategy**
End-to-End Product Discovery, User Research & Customer Interviews, Journey Mapping, Usability Testing, PM & Engineering Triad Alignment.
- **UI State & Behavioral Contracting**
AI UI Behavioral Contracts, Component API Alignment, W3C Design Token Architecture, Generative Layout Systems, WCAG 2.1 AAA Accessibility.
- **AI & Agentic Interaction Design**
Human-in-the-Loop (HITL) Workflows, Conversational Search & RAG UI, Non-Deterministic User States, Confidence & XAI Visuals.
- **Forward-Deployed Execution**
High-Density Enterprise SaaS, Complex Domain Logic Translation, Pre-Sprint Engineering Alignment, Client Co-Design.

PROFESSIONAL EXPERIENCE

JAGGAER | Lead Product Designer & AI Design Engineer

Durham, NC | June 2022 – July 2026

- **Enterprise Product & Technical Ownership:** Architected end-to-end UX for flagship enterprise SaaS processing multi-billion-dollar annual procurement volumes for Tier-1 accounts (BMW, Procter & Gamble, HP). Directed cross-functional alignment to translate complex compliance rules into production specs.
- **Front-End State Sandboxing:** Built interactive code prototypes using Claude Design and Cursor across 5+ core multi-tenant modules, mapping non-deterministic state logic and edge cases prior to sprint planning to ensure zero-rework handoffs.
- **LLM Component Governance:** Authored UI behavioral contracts and schema specifications governing dynamic component rendering from real-time LLM outputs, establishing strict front-end guidelines across AI workflows.
- **JAI Conversational AI Architecture:** Engineered a 5-phase intent model (Request → Intent Confirmation → Search Results → Insight → Action) establishing the foundational interaction framework that converted unstructured natural-language queries into deterministic workflows.
- **Human-in-the-Loop (HITL) Agent Interfaces:** Designed side-panel HITL interfaces within JAI (AI Bid Analyzer Agent) to parse dense supplier quote data into scannable metric cards, severity-coded risk alerts, and action chips.
- **Model Evals Suite Redesign:** Architected the AI Evals diagnostic suite, consolidating 3 core model performance telemetry streams (Relevancy, Faithfulness, Latency) into an executive-level testing interface to accelerate ML model evaluation.

PrismRBS | Senior Product Designer

Lincoln, NE | 2017 – 2022

- **Enterprise UX Modernization:** Led end-to-end UX/UI architecture, interactive prototyping, and visual system design for high-volume SaaS platforms across administrative and financial domains.
- **Design Systems & Scalability:** Audited legacy, data-dense administrative platforms to build a scalable Figma design system and reusable component libraries, unifying interaction standards across multi-team product squads.
- **Pre-Build Workflow Validation:** Conducted direct user research and interactive prototyping to validate complex multi-step financial workflows prior to engineering handoff.

PRIOR PROFESSIONAL EXPERIENCE

- Nebraska Book Company | UI/UX Designer (2012 – 2017) — Executed hands-on UX/UI design across the product lifecycle for enterprise inventory management and e-commerce platforms.
- TD Ameritrade | Front-End Web Engineer (2010 – 2012) — Engineered production-grade web interfaces using HTML/CSS/JS and web accessibility standards, establishing core DOM rendering expertise.

EDUCATION & CERTIFICATIONS

-
- Bachelor of Science – Bellevue University
 - AI Automation with Claude – Anthropic Frameworks (2026)
 - GenAI for UX Designers – Coursera (2026)
 - Build Intelligent Agents Using OpenAI & N8N – Coursera (2026)
 - Conversation Design Fundamentals – Google (2026)
