

HERB HARDEN

Staff Enterprise Product Designer | AI + UI/UX Systems

Omaha, NE (Open to Remote) • herbharden.com • harden.herb@gmail.com • (402) 490-0851 • linkedin.com/in/herb-harden-30b337374

EXECUTIVE PROFILE

Enterprise Product Designer with 20+ years of experience bridging the gap between product vision and technical implementation across complex enterprise SaaS environments. Specialist in Figma, Claude Design, human-AI interaction patterns, stateful UI behavioral contracts, and design system strategy. Leverages rapid interactive sandboxing, visual low-code/no-code orchestrations, and front-end state modeling to specify edge cases and de-risk complex front-end logic—enabling engineering teams to build faster, cleaner production software without rework.

CORE EXPERTISE

AI SYSTEMS & INTERACTION

Human-in-the-Loop (HITL) Workflows • Non-Deterministic State Design • Confidence & XAI Visuals • Conversational Search & RAG UI

SYSTEMS & ARCHITECTURE

AI UI Behavioral Contracts • W3C Design Token Architecture • Generative Layout Systems • Component API Alignment

TOOLING & EXECUTION

Rapid Low-Code/No-Code Sandboxing (Claude, Cursor, n8n) • Front-End State Modeling • System Prompting & Schemas

ENTERPRISE STRATEGY

High-Density SaaS Layouts • Multi-Agent Orchestration • Ethical AI & Guardrails • WCAG Accessibility

PROFESSIONAL EXPERIENCE

JAGGAER | Sr Enterprise Product Designer

Durham, NC | June 2022 – July 2026

Key member of JAGGAER’s global UI/UX organization, serving as the sole UI/UX Lead dedicated to the flagship JAGGAER Direct product line—safeguarding mission-critical procurement platforms that process billions of dollars in enterprise order volume for global customers (including BMW, Procter & Gamble, and HP). Strategic bridge between product strategy, design systems, and development execution, translating complex domain logic and non-deterministic AI capabilities into production-ready visual specifications.

AI & INTELLIGENT SYSTEMS PROJECTS

- JAI Conversational AI Assistant Platform
- Global UI/UX Design & System Specs:** Collaborated with the global UI/UX team to design and document the complete library of conversational UI component specifications, interaction models, and non-deterministic user states.
 - Customer Care HITL Workflows:** Mapped end-to-end Human-in-the-Loop (HITL) approval flows, override mechanisms, and edge cases for global enterprise customer support operations.
 - Intent-Driven Interaction Model:** Modeled and specified the core Intent → Insight → Action user-search interaction pattern, defining precise user intent use cases and dynamic interface behaviors.
 - Conversational Search Interaction Architecture:** Formulated and specified a 5-phase conversational interaction framework (Request → Intent Confirmation → Search Results → Insight → Action) for JAI, translating natural-language sourcing requests into structured tables, risk-based insights, and proactive next-step actions—defining micro-specifications and component layouts that reduced cognitive load and accelerated decision velocity across enterprise RFQ workflows.

AI UI Component Behavioral Contracts

- **Stateful Component Contracting:** Authored comprehensive UI behavioral contracts and schema expectations that govern how dynamic components render in response to real-time LLM outputs, ensuring design system integrity across AI-driven flows.

Claude Design Prototyping & Handoff: Audit Management & CBD Frameworks

- **Rapid Front-End Sandboxing & Edge-Case Specification:** Utilized Claude Design for rapid interactive prototyping and front-end state modeling across Audit Management and the Component Cost Breakdown (CBD) framework, modeling complex state logic prior to development to eliminate logic gaps and prevent code rework.

AI Bid Analyzer Agent, AI Summaries & AI Evals

- **AI Bid Analyzer Agent:** Designed side-panel human-in-the-loop interfaces within the JAI framework to translate dense supplier quote data (TCO, CBD structures, lead times) into scannable metric cards, severity-coded alerts, and status-driven suggested action chips—reducing evaluation time while maintaining data transparency.
- **In-Context AI Summary Framework:** Designed a scalable enterprise UI framework for in-context AI synthesis across core workflows—ranging from Intelligent Document Validation (OCR accuracy & invoice mismatches) and Rating Result Analysis to 360 Supplier Risk Summaries—delivering transparent confidence scoring, severity-coded alerts, and direct action triggers across the platform.
- **AI Evaluations Redesign:** Led the UI/UX redesign of the AI Evals platform, transforming raw accuracy metrics (Relevancy, Faithfulness, Latency) into an intuitive testing suite with standardized terminology, contextual troubleshooting guidance, and executive insight dashboards to de-risk production AI deployments.

ENTERPRISE PRODUCT DESIGN (JAGGAER DIRECT)

End-to-End Product Design Ownership

- **Complete Product Lifecycle UI/UX Ownership:** Served as the single UI/UX owner for JAGGAER Direct, driving end-to-end product design across multiple concurrent modules while collaborating directly with multiple Product Managers and Product Owners.
- **Strategic Requirement Gathering:** Synthesized complex business requirements from Product Management alongside 1:1 direct customer feedback to propose, design, and validate new feature sets and workflow optimizations.
- **Design System-Compliant UI/UX Execution:** Created comprehensive wireframes, high-fidelity mockups, and interactive prototypes while expanding and adhering to enterprise design system standards.
- **Cross-Functional Alignment & Engineering Handoff:** Authored detailed design specifications, led pre-sprint alignment sessions with development teams, and presented quarterly product roadmaps and UI initiatives to executive, product, and technical leadership.

PrismRBS | Senior UX Designer

Lincoln, NE | 2017 – 2022

Spearheaded end-to-end UX/UI tasks, interactive prototyping, and visual interface architecture for high-volume enterprise SaaS applications. Audited legacy, data-heavy B2B software to build modern UI mockups and clickable prototypes in Figma, reducing visual clutter and streamlining multi-step enterprise workflows. Conducted direct user research to validate complex administrative flows prior to development, while designing reusable Figma component libraries that established enterprise visual standards, reduced technical debt, and accelerated sprint delivery alongside engineering teams.

Nebraska Book Company | UI/UX Designer

2012 – 2017

Executed hands-on UX/UI design across the entire product lifecycle for enterprise inventory and e-commerce platforms. Conducted continuous customer interviews to uncover pain points in legacy administrative interfaces, translating insights into accessible, high-fidelity responsive layouts and interactive prototypes.

TD Ameritrade | Front-End Web Developer

Omaha, NE | 2010 – 2012

Engineered production-grade web interfaces utilizing HTML, CSS, and web accessibility standards, establishing a strong technical foundation for UI execution.

EDUCATION & CERTIFICATIONS

- **Bachelor of Science** – Bellevue University

- **AI Automation with Claude** – Anthropic Frameworks (2026)
- **GenAI for UX Designers** – Human-AI Interaction (2026)
- **Conversation Design Fundamentals** – Google (2026)
