

PRODUCT DOCUMENTATION

Audit Management — Annotated UI Spec

A screen-by-screen reference for engineering. Each screen shows the UI with numbered callouts, and a legend identifying each component (by Mosaic Design System name), what it does, how it behaves, and the states / logic that govern it. No implementation detail — this describes how the product works and what the pieces are.

How to read this document. Blue numbered pins on each screenshot map to rows in the legend below it. Each legend row gives the **component** (with its Mosaic name), its **purpose & behavior** (including interactions), and its **states / conditional logic**. Component names in the catalog (final section) are reused throughout.

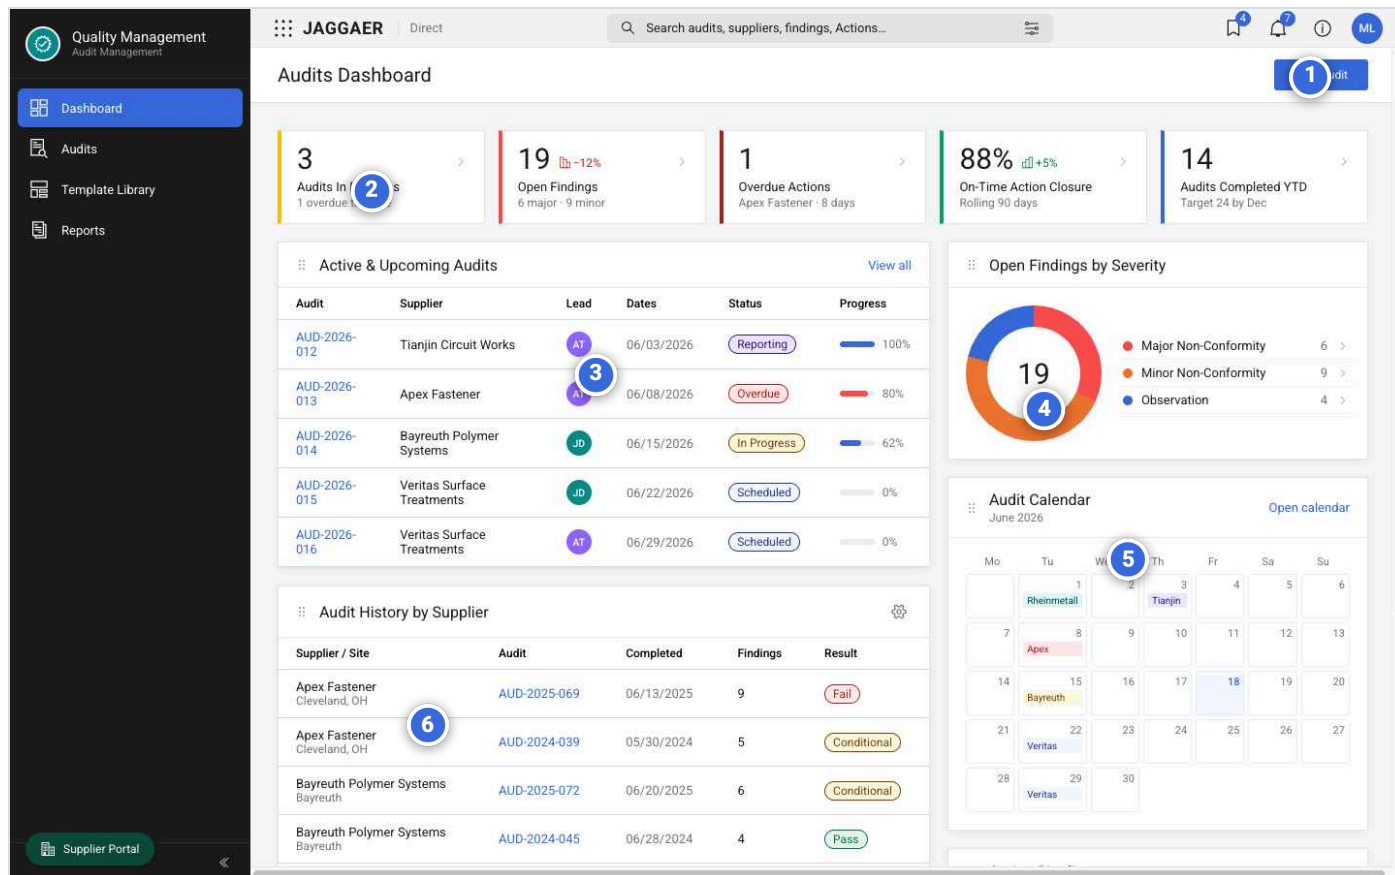

1 · Global chrome

Persistent frame present on every internal screen.

#	Component	Purpose & behavior	States / logic
—	Solution Rail Mosaic Navigation (vertical)	Left navigation between the module's top-level destinations (Dashboard, Audits, Template Library, Reports). Click to navigate.	Active item is highlighted. Opening an audit keeps <i>Audits</i> active; opening a report from Reports keeps <i>Reports</i> active.
—	Top Bar Mosaic Header	Global search, notifications, help/info, and account avatar. Brand/tenant lock-up on the left.	Static across screens; badges show unread counts.
—	Page Header Breadcrumb + title	Shows the location as <i>Audits · [View]</i> ; the parent segment links back to the dashboard. A back arrow returns to the previous screen.	List screens show a title + breadcrumb; record screens (Audit Detail) show a record toolbar instead.

2 · Dashboard

Program-level overview and the default landing screen.

#	Component	Purpose & behavior	States / logic
1	Plan Audit Button — primary	Launches the Plan Audit wizard (section 4).	Always enabled.
2	KPI Tiles Card w/ accent bar	Headline metrics — audits in progress, open findings, overdue actions, on-time closure, completed YTD. Clickable to the filtered list.	Values from live program data; trend deltas shown where relevant.
3	Active & Upcoming Audits Card + Data Grid	Shortlist of current/near audits with supplier, lead, dates, status, progress. Row links into the audit.	Filtered to active + upcoming statuses; "View all" opens the Audits screen.
4	Open Findings by Severity Donut chart + legend	Breakdown of open findings by Major NC / Minor NC / Observation.	Center shows total; legend rows link to filtered findings.
5	Audit Calendar Calendar (month)	Scheduled audits placed on their dates; color-coded by status.	"Open calendar" switches the Audits screen to calendar view.
6	Audit History by Supplier Card + Data Grid	Completed audits with result. Columns are configurable via the card's settings.	Configurable columns / ordering / row limit.

3 · Audits (Overview)

The master list of all audits.

Audit ID	Supplier / Site	Lead & Team	Window	Status	Findings	Progress
AUD-2026-014	Bayreuth Polymer Systems GmbH Bayreuth, DE	JD RK KR	06/15/2026 → 06/19/2026	In Progress	5	62%
AUD-2026-013	Apex Fastener Group Cleveland, OH	AT SM	06/08/2026 → 06/12/2026	Overdue	8	80%
AUD-2026-012	Tianjin Circuit Works Ltd. Tianjin, CN	AT RK	06/03/2026 → 06/06/2026	Reporting	6	100%
AUD-2026-015	Veritas Surface Treatments Sheffield, UK	JD SM	06/16/2026 → 06/16/2026	Scheduled	—	0%
AUD-2026-016	Veritas Surface Treatments Sheffield, UK	AT RK	06/29/2026 → 06/30/2026	Scheduled	—	0%
AUD-2026-011	Nordic Precision Components AB Göteborg, SE	JD RK	05/19/2026 → 05/22/2026	Completed	2	100%
AUD-2026-010	Rheinmetall Tooling GmbH Düsseldorf, DE	AT SM	06/01/2026 → 06/04/2026	Sent to Supplier	4	100%
AUD-2026-009	Lombardi Castings S.r.l. Brescia, IT	JD SM	05/06/2026 → 05/08/2026	Completed	1	100%
AUD-2026-017	Kawasaki Seal & Gasket Co. Osaka, JP	JD	07/13/2026 → 07/15/2026	Draft	—	0%

#	Component	Purpose & behavior	States / logic
1	Page Header Breadcrumb	"Audits · Overview"; back arrow + parent link to dashboard.	—
2	Toolbar icons View toggle · Settings · Filter · Search	List/calendar view toggle; Filter icon opens the Quick Filter panel (section 3.1).	Filter icon shows an active-count badge when filters are applied; turns blue when the panel is open.
3	Plan Audit Button — primary	Launches the Plan Audit wizard.	Always enabled.
4	Pagination / Display Mosaic Pagination	Result count + page size selector; page controls.	Resets to page 1 when filters or sort change.
5	Status Tag Mosaic Tag	The audit's lifecycle status, color-coded.	One of Draft / Scheduled / In Progress / Reporting / Sent to Supplier / Completed / Overdue.
6	Sortable columns & avatars Data Grid · Avatar Stack	Every column header sorts (click → asc, again → desc, third → clear); lead & team shown as avatar stack.	Active sort column shows a blue caret; sort applies across pages.

3.1 · Quick Filter panel & Status Key

Quick Filter — collapsible Status / Supplier / Timeline sections, live counts, Active Filter summary with removable chips. The ⓘ next to "Status" opens the Status Key popover (lifecycle order + meaning).

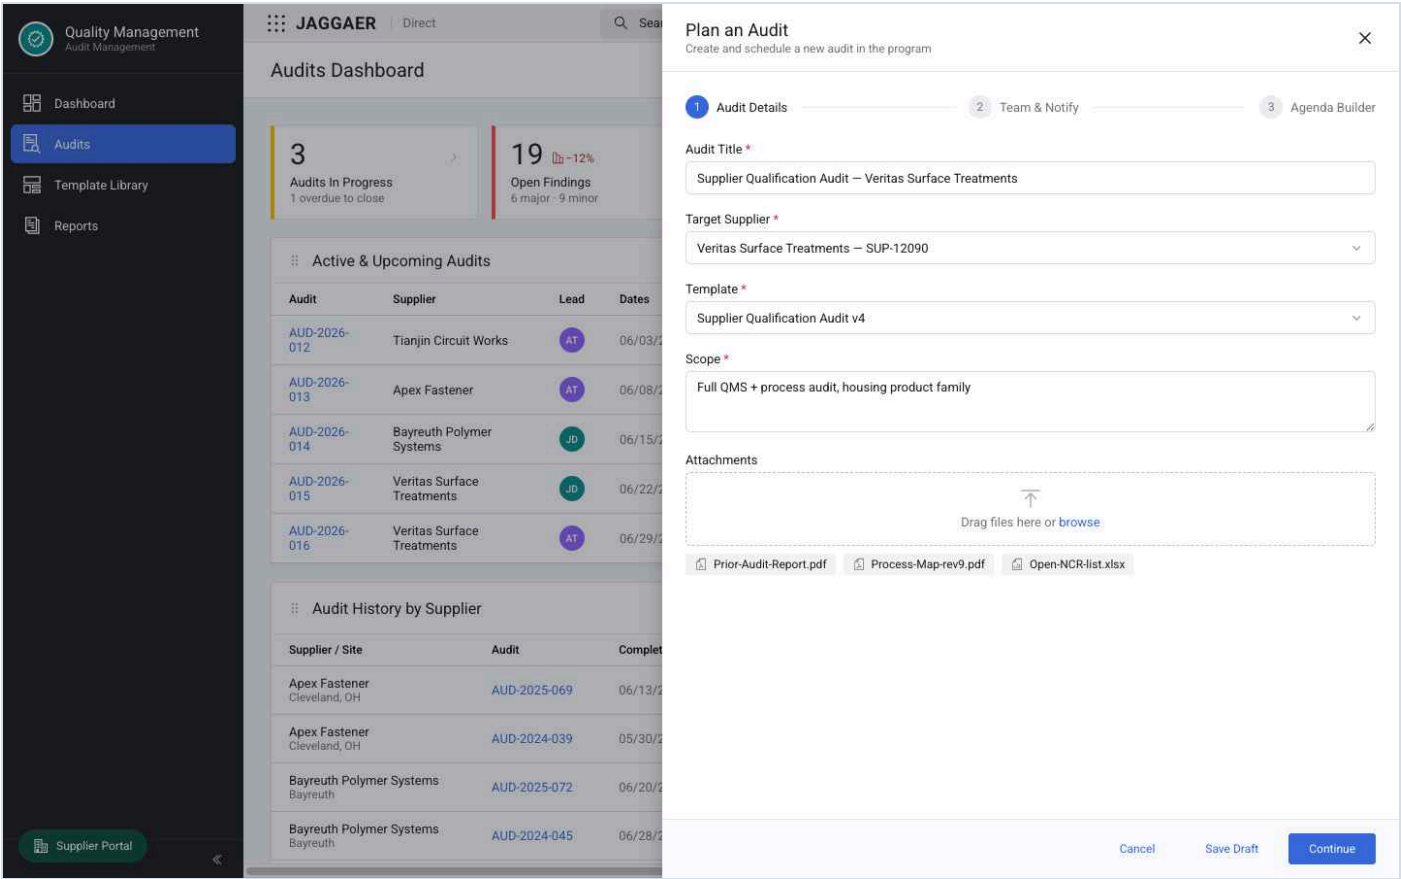

Calendar view — the same audits placed on their scheduled dates, color-coded by status with a legend.

#	Component	Purpose & behavior	States / logic
—	Filter sections Collapsible + Checkbox list	Status & Supplier as checkable options with counts; Timeline as a date range. Selecting filters the grid live.	Sections expand by default; each shows a live match count.
—	Active Filter summary Chips + Clear all	Shows applied filters as removable chips; "Clear all" resets.	Count badge reflects number of active filters; hidden when none.
—	Status Key Popover (ⓘ trigger)	Explains the lifecycle order and the meaning of each status.	Opens from the info icon on the Status header; text is selectable.

4 · Plan Audit

A wizard (overlay) for creating and scheduling a new audit.

Plan Audit — step 1 of a 3-step wizard (Audit Details → Team & Notify → Agenda Builder).

#	Component	Purpose & behavior	States / logic
—	Wizard stepper Mosaic steps	Three steps: Audit Details, Team & Notify, Agenda Builder.	Current step highlighted; advance with Continue.
—	Form fields Text Input · Dropdown · Textarea	Audit title, target supplier, template, scope; file attachments.	Required fields marked with *; validated before continue.
—	Footer actions Button — secondary / primary	Cancel · Save Draft · Continue. Save Draft creates the audit in Draft; completing the wizard schedules it.	Save Draft → Draft status; finish → Scheduled (+ supplier notified if chosen).

5 · Audit Detail

The record workspace where an audit is carried out. Shown here **In Progress** (the working state).

SECTIONS

- 1. Quality Management System
- 2. Document & Record Control
- 3. Measurement & Calibration
- 4. Production & Process Control
- 5. Nonconformity & Corrective Action

1. Quality Management System - weight 20% 3/3 assessed

4.4 Are documented QMS processes defined and maintained for the audited product family? **Auditor**

6 **Conform** **Non-Conf** **Observe** **N/A** **Edit note**

Required **Note:** QMS map 9, process map current.

5.1 Is there documented evidence of management review within the last 12 months? **Auditor**

Conform **Non-Conf** **Observe** **N/A** **+ Add note**

6.1 Have risks and opportunities for the production process been assessed? **Both**

Conform **Non-Conf** **Observe** **N/A** **Edit note**

Required **Note:** FMEA present but last reviewed 14 months ago.

Observation — record a finding to note the improvement opportunity. **+ Record finding**

2. Document & Record Control - weight 15% 2/2 assessed

7.5.3 Are work instructions at point-of-use the current controlled revision? **Auditor**

Conform **Non-Conf** **Observe** **N/A** **Edit note**

Required **Note:** Station 2 on rev C (finding F-014-05).

Audit Window

#	Component	Purpose & behavior	States / logic
1	Record Toolbar Back + ID + supplier	Back arrow to previous screen; audit ID and supplier name.	—
2	Status Tag Mosaic Tag	Current lifecycle status of this audit.	Drives editability + primary action (see 5.1).
3	Primary / Secondary actions Button	Save (secondary) + the stage-dependent primary action.	Primary = Generate Report → Send Audit to Supplier → Mark Audit Complete; hidden when Completed. Report tab adds print/export/regenerate icons (regenerate hidden once sent/completed).
4	Tabs Mosaic Tabs	Checklist · Findings · Report · Actions · Communication · Team & Documents · Log.	Findings/Actions/Communication disabled in Draft & Scheduled; Report enabled once ready; counts shown per tab.
5	Section accordion Collapsible + section nav	Checklist grouped into weighted sections; left nav jumps between them.	Shows assessed count per section; layout switchable (sectioned / flow / split).
6	Answer control Segmented control	Per-question response: Conform / Non-Conform / Observe / N/A. "Add note" and a "Required" marker sit alongside.	Editable In Progress/Reporting; disabled Draft/Scheduled; locked & muted when Sent/Completed. Selecting Non-Conform/Observe reveals "Record finding".
7	Record finding prompt Inline callout + link	Appears under an Observation/Non-Conformity; opens the Record Finding panel (section 5.2).	Only shown when the answer warrants a finding.
8	Assessment Summary Card + counts	Live tally: Conforming / Non-Conforming / Observation / Not Assessed / Unanswered.	Updates as answers change; "Unanswered" reflects required-but-blank items.
9	Conformance Score Donut + breakdown	Weighted score summarizing checklist performance.	Recalculates live; uses a distinct color at 0%.

5.1 · Audit Detail across statuses

The same screen changes with status. Note the answer controls (disabled → editable → locked) and the primary action.

The screenshot shows the 'Draft' state of an audit for 'Kawasaki Seal & Gasket Co.'. The interface includes a sidebar with 'Dashboard', 'Audits', 'Template Library', and 'Reports'. The main content area displays the audit checklist with sections for '1. Quality Management System', '2. Document & Record Control', and '3. Measurement & Calibration'. Each section contains specific audit questions with status indicators (e.g., 'Conforming', 'Non-Conforming', 'Observation', 'Not Assessed', 'Unassessed'). A 'Supplier' section shows details for 'Kawasaki Seal & Gasket Co.'. A 'Conformance Score' section shows a score of 0% with a breakdown of 0 conforming, 0 non-conforming, and 0 observations. An 'Assessment Summary' section shows the overall status. The 'Audit Window' is visible at the bottom.

Draft Answers & notes disabled; Findings/Actions/Communication tabs disabled; primary = Generate Report.

The screenshot shows the 'Scheduled' state of an audit for 'Veritas Surface Treatments'. The interface is similar to the Draft state, but the 'Assessment Summary' and 'Conformance Score' sections are disabled. The 'Supplier' section shows details for 'Veritas Surface Treatments'. The 'Conformance Score' section shows a score of 0% with a breakdown of 0 conforming, 0 non-conforming, and 0 observations. The 'Audit Window' is visible at the bottom.

Scheduled Same as Draft – planned but not started; answers stay disabled.

The screenshot shows the 'Reporting' state of an audit for 'Tianjin Circuit Works Ltd.'. The interface is similar to the Draft state, but the 'Assessment Summary' and 'Conformance Score' sections are disabled. The 'Supplier' section shows details for 'Tianjin Circuit Works Ltd.'. The 'Conformance Score' section shows a score of 0% with a breakdown of 0 conforming, 0 non-conforming, and 0 observations. The 'Audit Window' is visible at the bottom.

Reporting Fieldwork done; report generated & reviewed; primary = Send to Supplier.

The screenshot shows the 'Sent to Supplier' state of an audit for 'Rheinmetall Tooling GmbH'. The interface is similar to the Draft state, but the 'Assessment Summary' and 'Conformance Score' sections are disabled. The 'Supplier' section shows details for 'Rheinmetall Tooling GmbH'. The 'Conformance Score' section shows a score of 0% with a breakdown of 0 conforming, 0 non-conforming, and 0 observations. The 'Audit Window' is visible at the bottom.

Sent to Supplier Checklist locked read-only; primary = Mark Audit Complete.

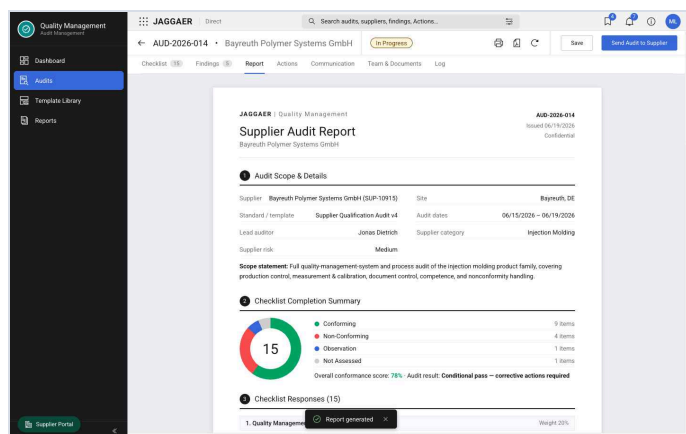

The screenshot shows the 'Completed' state of an audit for 'Nordic Precision Components AB'. The interface is similar to the Draft state, but the 'Assessment Summary' and 'Conformance Score' sections are disabled. The 'Supplier' section shows details for 'Nordic Precision Components AB'. The 'Conformance Score' section shows a score of 0% with a breakdown of 0 conforming, 0 non-conforming, and 0 observations. The 'Audit Window' is visible at the bottom.

Completed Fully read-only record; no primary action.

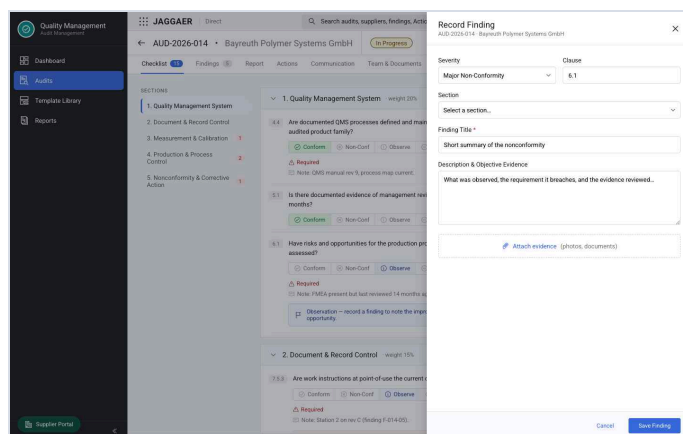

The screenshot shows the 'Overdue' state of an audit for 'Apex Fastener Group'. The interface is similar to the Draft state, but the 'Assessment Summary' and 'Conformance Score' sections are disabled. The 'Supplier' section shows details for 'Apex Fastener Group'. The 'Conformance Score' section shows a score of 0% with a breakdown of 0 conforming, 0 non-conforming, and 0 observations. The 'Audit Window' is visible at the bottom.

Overdue Exception state – past its window; behaves like its underlying stage but flagged red.

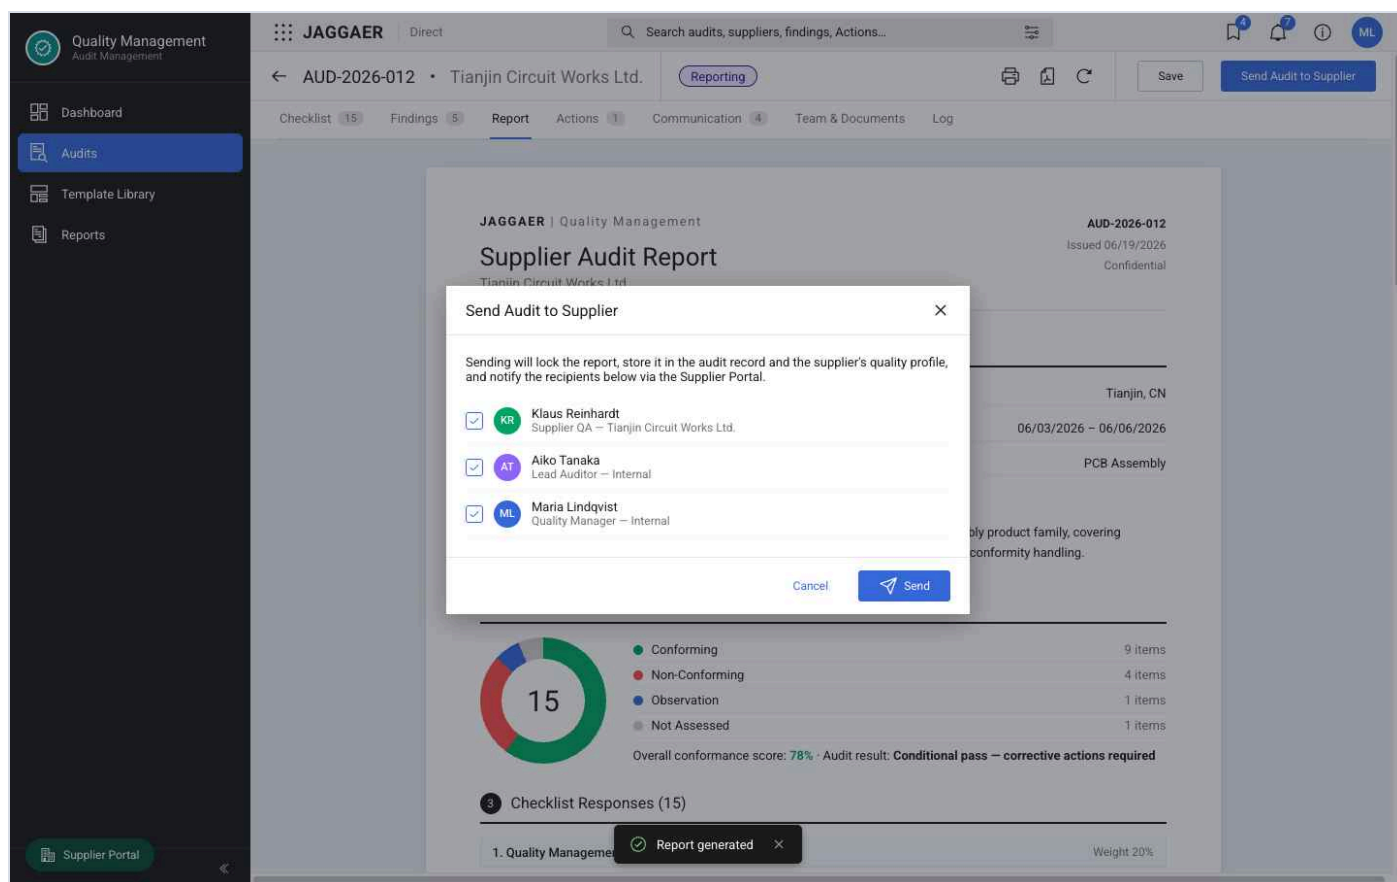

5.2 · Report tab & key panels

Report tab – the generated report rendered inline (scope, completion summary + conformance donut, responses & findings). Toolbar gains print / export / regenerate icons.

Record Finding – side panel (Mosaic Side Panel): Severity, Clause, Section, Finding Title, Description & Objective Evidence, Attach evidence. Save Finding / Cancel.

Send Audit to Supplier – modal (Mosaic Modal) with recipient checkboxes (supplier QA, lead auditor, quality manager). Sending locks the report and transitions the audit to Sent to Supplier.

RPT-2026-010 AUD-2026-010	Rheinmetall Tooling GmbH	AT Aiko	82%	4	Pass	06/04/2026	Sent to Supplier ...
RPT-2026-011 AUD-2026-011	Nordic Precision Components AB	JB Jonas	90%	2	Pass	05/22/2026	Sent to Supplier ...
RPT-2026-009 AUD-2026-009	Lombardi Castings S.r.l.	JB Jonas	96%	1	Pass	05/08/2026	Sent to Supplier ...

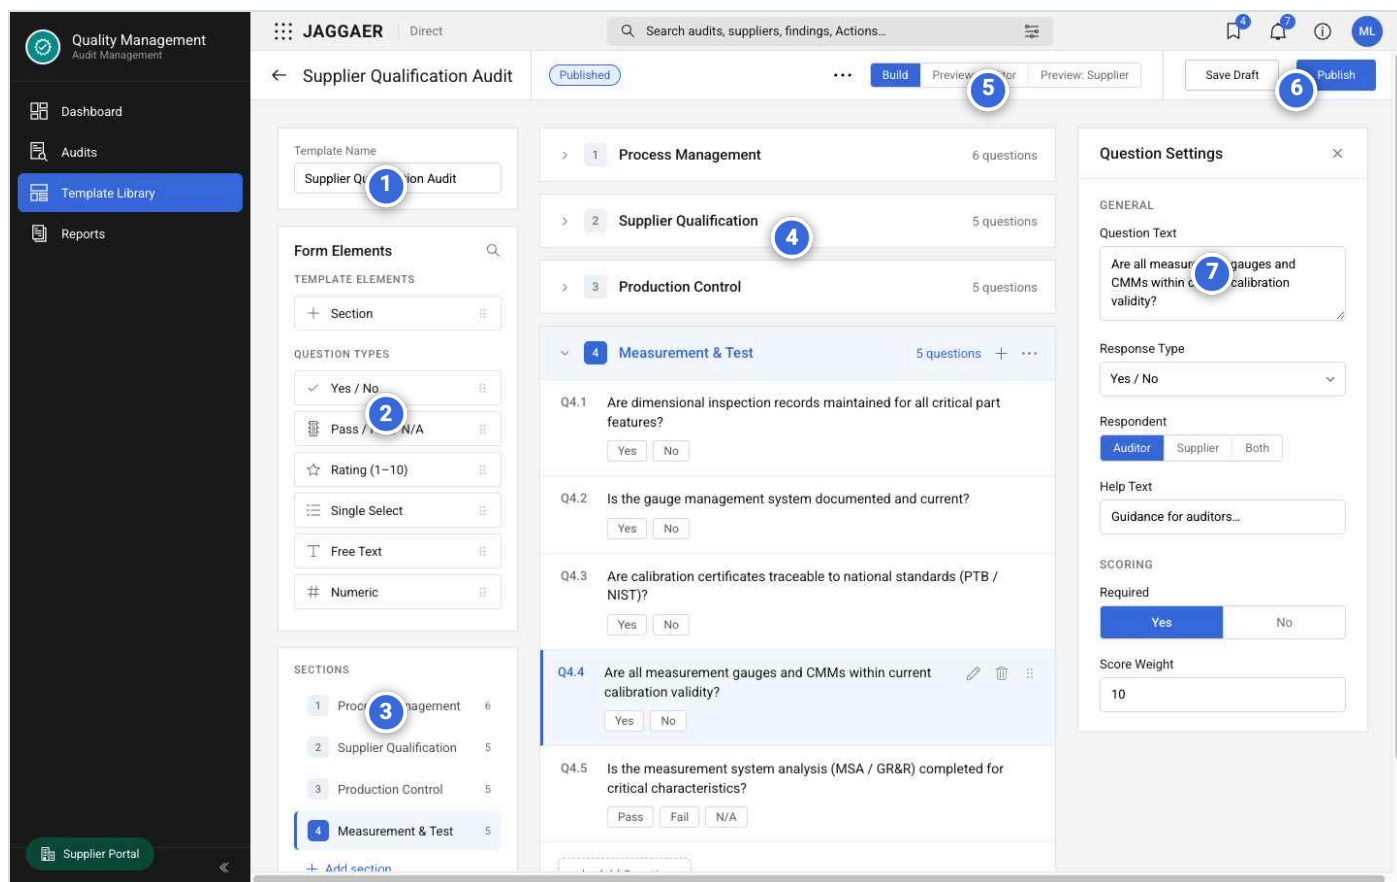

Reports — every audit report with supplier, conformance score and send status.

#	Component	Purpose & behavior	States / logic
—	Report list Data Grid	One row per audit report; row opens that audit's Report tab (rail stays on Reports → shows as Audits when the audit opens).	Sortable columns; conformance score per row.
—	Send status Mosaic Tag (2-state)	Whether the report has been sent.	Only two values: Not Sent to Supplier / Sent to Supplier.
—	Row actions Overflow menu	Per-row actions (open, download, re-distribute / view audit).	Action set depends on sent vs. not-sent.

7 · Template Library & Builder

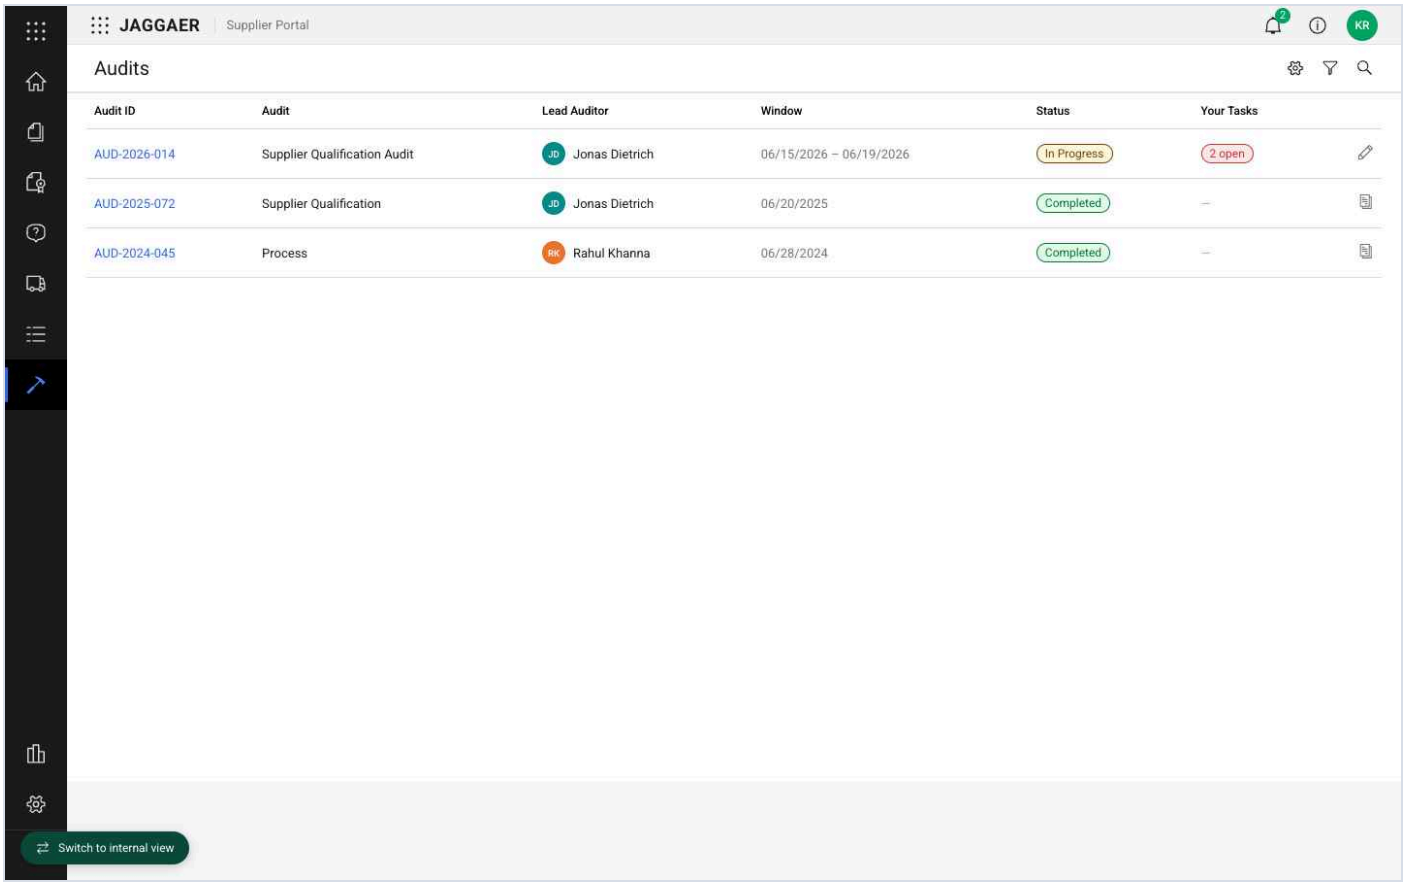

Template Library — all templates with structure (sections · questions), usage, last updated, status. Template Builder — see callouts below.

#	Component	Purpose & behavior	States / logic
1	Template Name Card + Text Input	The template's name.	Required to publish.
2	Form Elements palette Card + list	Add a Section, and question types (Yes/No, Pass/Fail/N/A, Rating, Single Select, Free Text, Numeric).	Adds to the currently expanded section.
3	Sections navigator Card + list	Sequentially numbered sections; click to jump; shows question count.	Numbered 1..n; "Add section" appends.
4	Section & question canvas Collapsible list	Sections with their questions (Q1.1, Q1.2...). Select a question to edit it.	Selected question highlighted; expandable.
5	Build / Preview toggle Segmented control	Switch between Build and Preview (Auditor / Supplier views).	—
6	Save Draft / Publish Button — secondary / primary	Save the template as draft or publish for use.	Publish makes it available for scheduling.
7	Question Settings Side panel	Edit the selected question: response type, respondent, required, help text, score weight.	Populated from the selected question; empty when none selected.

8 · Supplier Portal

Supplier Portal – an alternate shell showing the supplier's audits and their open tasks. "Switch to internal view" returns to the main app.

#	Component	Purpose & behavior	States / logic
—	Supplier audit list Data Grid	Audits involving this supplier, with status and their open task count.	"Your Tasks" shows open-action count per audit.
—	Alternate rail / header Mosaic Navigation	Supplier-facing chrome distinct from the internal shell.	—

9 · Component catalog

The reusable Mosaic components used across the module, and where they appear.

Component (Mosaic)	Used for	Where
Button (primary / secondary)	Actions; one primary per context	Everywhere
Tag	Lifecycle status & finding severity (color-coded)	Lists, detail, reports
Data Grid / Table	Rows of business objects; sortable, paginated	Audits, Reports, Templates, Dashboard cards
Tabs	Sub-navigation within a record	Audit Detail
Segmented control	Mutually-exclusive choice	Checklist answers, Build/Preview toggle
Checkbox	Multi-select	Quick Filter, Send modal recipients
Dropdown / Select	Single choice from a list	Forms, filters, question settings
Card	Grouped content surface (square, hairline/shadow)	Dashboard, summaries, builder
Modal	Focused blocking task	Send Audit to Supplier
Side Panel	Contextual edit without leaving the screen	Record Finding, Question Settings
Popover	Lightweight contextual info/menu	Status Key, overflow menus
Donut chart	Proportional breakdown	Findings by severity, conformance score
Avatar / Avatar Stack	People (lead & team)	Lists, detail
Progress bar	Completion	Audits list
Pagination	Result paging + page size	All list views
Breadcrumb / Record toolbar	Location & back navigation	All screens
Toast	Transient confirmation	Save, generate, send actions
Calendar	Date-placed audits	Dashboard, Audits calendar view

Companion documents: [Status & Behavior](#) · [User Journeys](#) · [Feature Specs](#).
