

Audit Management — User Journeys

The main end-to-end flows through the product, shown as step-by-step flowcharts. Each flow ends in the audit status (or outcome) it produces.

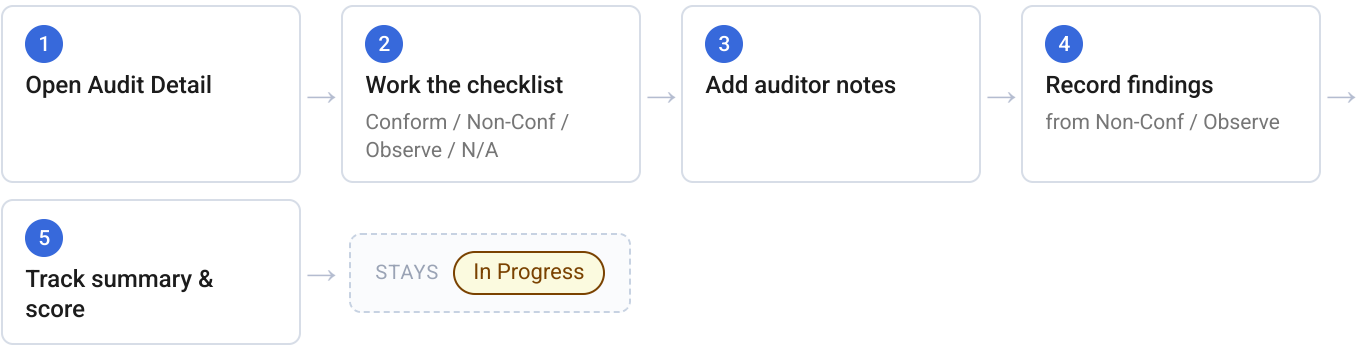

Journey A · Plan an audit

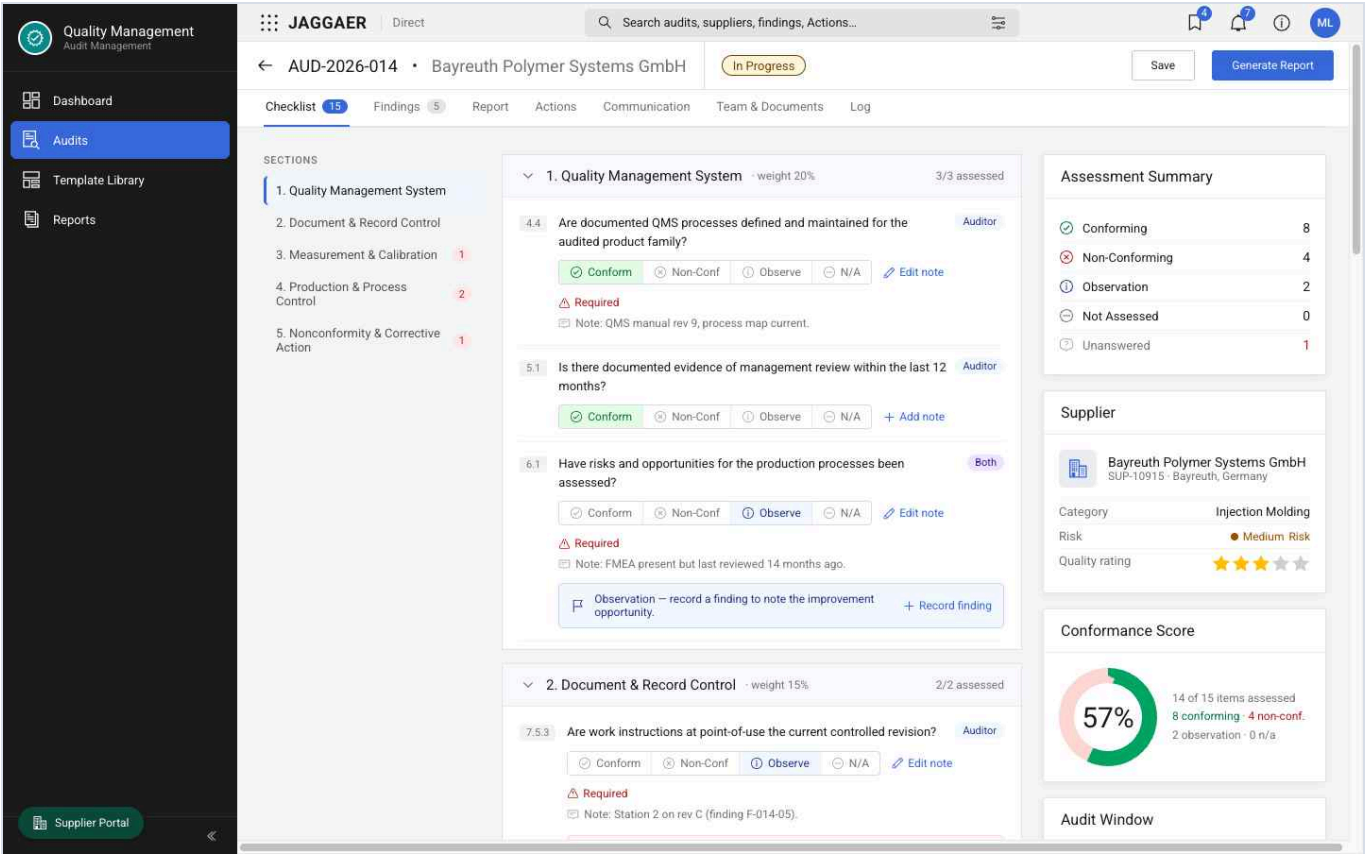

Actor: Lead Auditor / Quality Manager

Journey B · Conduct fieldwork

Actor: Lead Auditor + team · The core of the product

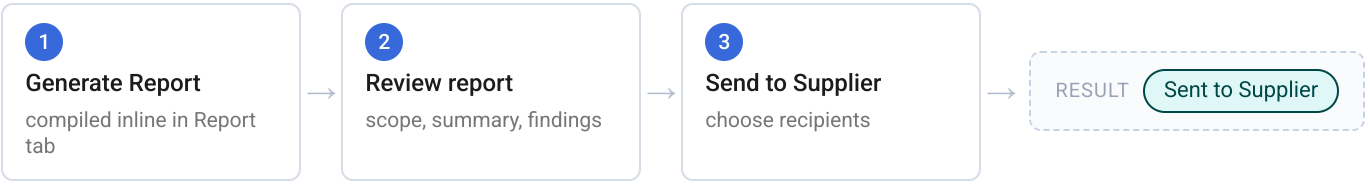

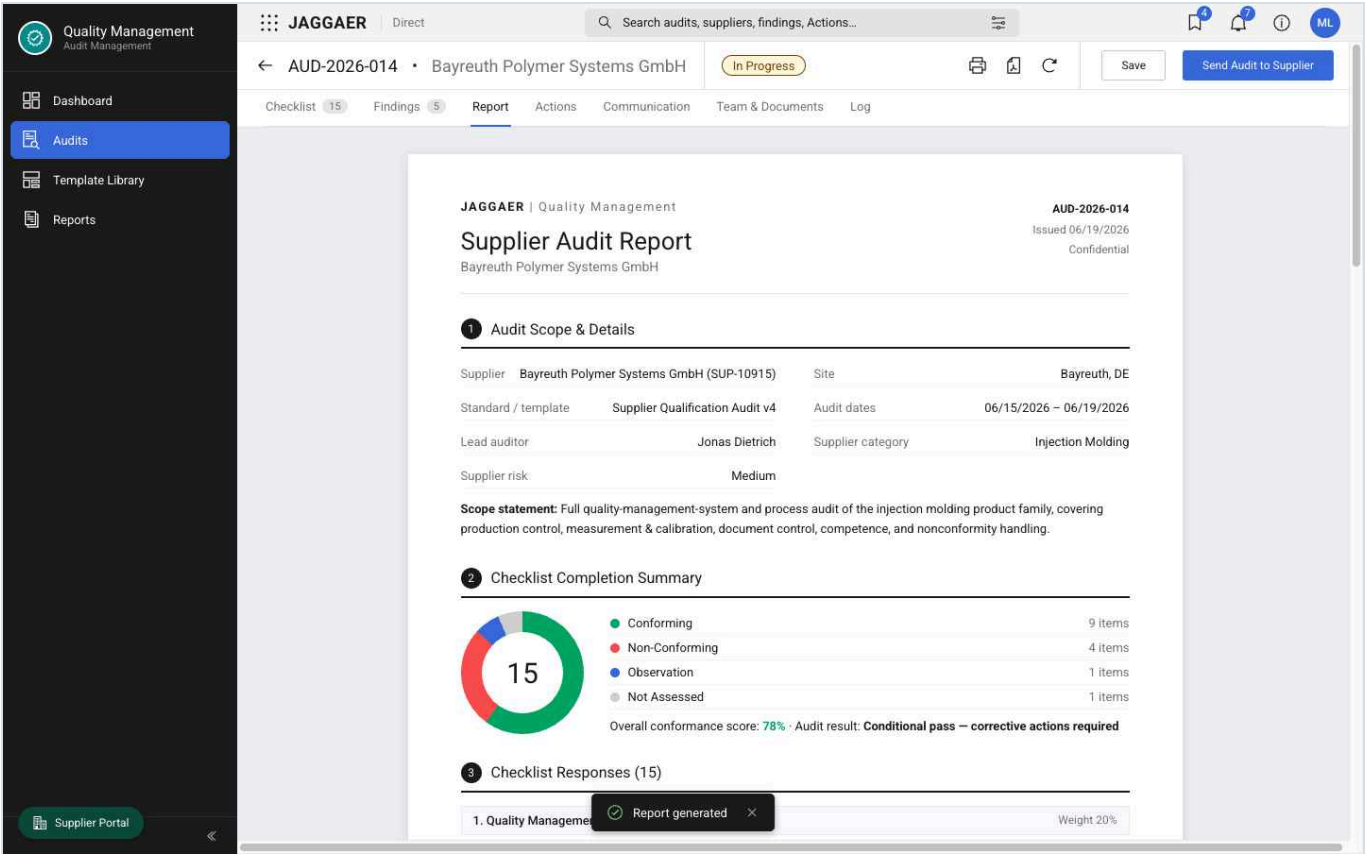

Audit Detail — the checklist during fieldwork, with answer controls, notes, required markers, and the live Assessment Summary and conformance score.

Journey C · Generate, review & send the report

Actor: Lead Auditor

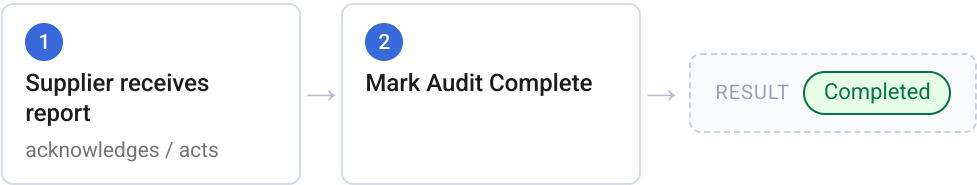

On send, the checklist locks to a read-only record.

The generated report rendered inline in the Report tab, with the primary action now "Send Audit to Supplier".

Journey D · Close the audit

Actor: Lead Auditor / Quality Manager

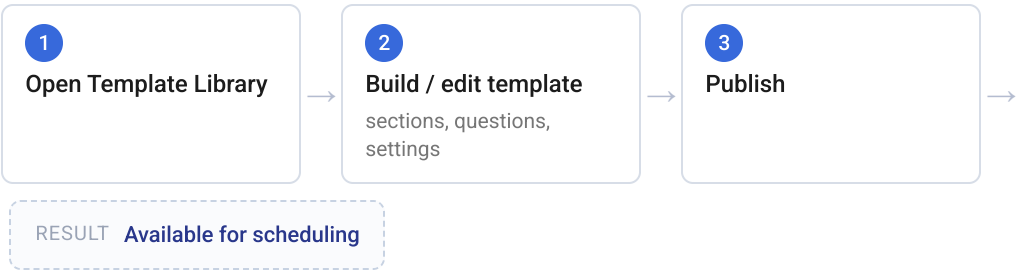

Journey E · Track corrective actions

Actor: Quality Manager, Supplier Contact · Surface: Actions (CAPA)

Journey F · Manage templates

Actor: Template Administrator · Surface: Template Library

Part of a three-document set: (1) Product Overview · (2) User Journeys · (3) Feature Specs.
